- Arellano Street, Dagupan City, Pangasinan
- Bachelor of Science in Information Technology
- Hawak-Kamay Scholar

SCHOOL PROJECTS

Jak Em Poy (GUI)
Group Project 2022
Python | Visual Studio Code

- JAK EM POY is our Group Project for out Mini-Defense. We created it using Visual Studio Code and Picture module so we can add pictures to it. It contains pictures, buttons, and scoring. It is a Player Vs. Computer, We selected a formal theme for it and it is easy to use.

- We came on a Jak Em Poy based on our activity in Period 1, and we decided remake it but with GUI so it is formal looking program. We inserted some Pictures, Buttons, and Scoring.

CERTIFICATES

- Python For Begginers (Solorlearn)
